

**REMARKS**

This is further responsive to the Election of Species Requirement dated March 6, 2009.

Applicants elect the species where all  $R^1$  are halogen, X is represented by formula (IA), both  $R^2$  are a monovalent substituent and Y is oxygen.

In addition, Claim 5 has been amended to recite oxygen and sulfur as alternatives for Y. Support for the amendment to Claim 5 is located in the specification at, for example, the paragraph bridging pages 8 and 9.

Claims 1-3 and 5-10 read on the elected species.

Respectfully submitted,

SUGHRUE MION, PLLC
